**NEWS RELEASE**

## BQE Software Announces the Release of BillQuick 2008 with Over 200 New Features. The New Simple Time Card Makes Time Tracking and Billing Fast and Easy.

**Los Angeles, March 18, 2008:** BQE Software Inc, the innovative leader in time billing & project management solutions, announced today the release of BillQuick® 2008, a major upgrade to the affordable business application that simplifies time tracking, project management and billing with a redesigned interface, enhanced reports, better communication tools and an exclusive new feature set to accommodate purchase orders, vendor bills and employee controls. BillQuick 2008 delivers affordable, easy-to-use, and rapidly-deployed time billing, project management and human resources capabilities that were previously available only to the high-end market and through complicated implementations.

BillQuick continues to revolutionize time billing software with QuickTabs™ which enables switching between windows by clicking a tab or scrolling through the tabs. According to Shafat Qazi, President and CEO of BQE Software, "BillQuick is taking time and billing software beyond simple time tracking, giving users a professional business application for easily incorporating precision time keeping, enterprise-wide accounting, client invoicing and project management into their daily workflow."

BillQuick customers can use smart pre-filled time sheets, track consultant bills, compare project budgets against costs and adjust invoices within BillQuick in just a few clicks. BillQuick 2008 delivers enhanced integration with QuickBooks® by Intuit Software (NasdaqGS: INTU), Microsoft® Office Accounting (NasdaqGS: MSFT), Peachtree® Accounting by Sage (LSE: SGE.L) and more.

BillQuick 2008 includes "Employee Control", a powerful feature to support companies with many projects. It helps them achieve corporate objectives by focusing employee tasks and effort on projects that are most important...and most profitable. Historically, this has been problematic for professional services firms by wasted staff and management time, resulting in write-offs and loss of revenue. With BillQuick employee control, users can easily assign specific projects and tasks to their employees in just a few clicks.

To provide a complete picture of enterprise performance, BillQuick 2008 integrates both the rich information about time-tracking and project management from BillQuick as well as other real-time operational data from QuickBooks® Software, Microsoft Office® Accounting, Peachtree® Accounting, communication data from Microsoft Outlook® and credit card payment transactional data from a variety of third party payment processing vendors.

"By delivering products with comprehensive, leading capabilities to our clients, BillQuick has staked out the top position in time billing and project management solutions market," said Will Breiholz, General Manager of BQE Software. "BillQuick 2008 provides visibility and accountability – services organizations now have a tightly integrated suite of tools that ensure employees are in the right place at the right time and delivering the right results, while invoicing clients in the most efficient and flexible method available on the market today."

With more than 200 new & improved features, BillQuick 2008 raises the bar and sets new standards in time billing & project management for professional services firms, at an affordable price. BillQuick is available direct to customers at [www.BillQuick.com](http://www.BillQuick.com), and through a network of over 850 authorized resellers, certified BillQuick Advisors and QuickBooks Advisors from The Sleeter Group. To experience BillQuick 2008, download a fully-functional trial or take a hands-on guided tour: [www.BillQuick.com/Walkthru](http://www.BillQuick.com/Walkthru), contact BillQuick Sales at [sales@bqe.com](mailto:sales@bqe.com) or call 1-888-245-5669.

**About BQE Software:** BQE Software's time billing and project management solutions create competitive advantage for professional services providers such as attorneys, engineers, architects, CPAs and IT consultants. BQE's flagship product, BillQuick, combines precision time tracking and intelligent invoicing with powerful project management and reporting tools -- together delivering a complete solution that is priced to deliver quick return on investment. Widely regarded as the most comprehensive time billing system on the market today, BillQuick integrates seamlessly with popular accounting programs including QuickBooks, Peachtree and Microsoft Office Accounting.
